

CADD Supplies

Xerographic Media

Media is available in standard cut sheet and rolls. Custom sizes also available.

20 XB - 20 LB. Xerographic Bond

A 20 lb. xerographic bond paper specifically designed for engineering copiers. Manufactured to control curl and static, the bright white base provides a strong visual contrast.

24 XB - 24 LB. Xerographic Bond

A 24 lb. xerographic presentation bond specifically designed for engineering copiers. Manufactured to control curl and static, the bright white 24 lb. base provides a strong visual contract.

Note: Our 24 lb. xerographic bond can also be used in laser equipment.

Ultralar 3M2XS

3 mil Double Matte Xerographic Film. Heat stabilized polyester base with excellent toner adhesion and drafting surface.

Ultralar 4M2XS

4 mil Double Matte Xerographic and Laser Plotting Film. Heat stabilized polyester base with excellent toner adhesion and drafting surface.

Ultralar 4M0X

4 mil Clear Xerographic Film. Heat stabilized polyester base with excellent toner adhesion.

Ultralar 3M2X

3 mil Double Matte Xerographic Film. Heat stabilized polyester base with excellent toner adhesion and drafting surface.

Ultralar 4M2X

4 mil Double Matte Xerographic and Laser Plotting Film. Heat stabilized polyester base with excellent toner adhesion and drafting surface.

Vellum MX

This 16 lb. high quality vellum provides permanent toner images for masters that do not require image deletions. 100% rag content, archival quality.

Vellum HX

This 20 lb. vellum has all the features and benefits of the 16 lb. vellum, with extra durability and strength in handling. Excellent toner adhesion and tear resistance. **High quality, 100% rag content, archival.**

Transbond MX

A 15 lb. general purpose, low cost translucent media for short-run, medium speed intermediates.

Transbond HX

An 18 lb. general purpose, low cost translucent media the same as above. A heavier weight for additional strength in handling.

Vellum MXE

Premium quality ERASABLE 16 lb. vellum. Coating allows removal of toner image with an eraser. 100% rag content, archival quality.

Vellum MXE-VV

Valuvel synthetic ERASABLE 16 lb. vellum. Coating allows removal of toner image with an eraser. Synthetic coating provides a less expensive alternative to rag vellum.

Vellum HXE

Premium 20 lb. ERASABLE vellum. Coating allows removal of toner image with an eraser. Heavier base provides additional durability and tear resistance. 100% rag content, archival quality.

Vellum HXE-VV

Valuvel synthetic ERASABLE in a 20 lb. weight. A less expensive alternative to rag vellum.

CADD Supplies

Ink Jet Media

Media is available in standard cut sheets and rolls from 11" to 60". Custom sizes are also available.

JPP-20

20 lb. bright white ink jet paper for economical high quality plots. Coated for monochrome plotting.

JPP-24

24 lb. bright white presentation ink jet bond for high quality monochrome plots. Coated for monochrome plotting and spot color plotting.

All media is available in custom sizes. Ink jet product is shipped on a 2" core size unless otherwise specified.

JPC-24P

Our most popular ink jet bond. 24 lb. color ink jet bond for use on most ink jet plotters. Highly economical, excellent performance. Matte finish provides clear, full color plots on a 24 lb. clay coat base. For DesignJet, Calcomp TechJet and similar ink jet plotters.

JPC-24BC

24 lb. color ink jet bond. For those who prefer a 24 lb. bond with heavy density. Handles black fills exceptionally well and provides clean, crisp lines on all ink jet plotters. A favourite with geological companies.

JPC-247

Premium performance ink jet bond developed specifically for HP750C and for use in the HP755CM DesignJet plotters. Additional coating allows for absorption of additional ink which is laid down by the HP750C. Matte finish provides a high resolution and vibrant colors on a 24 lb. bright white base.

JPC-25R

Warm white 25 lb. presentation bond. A smooth warm white finish providing a subtle and rich matte presentation plot.

JPC-27R

Same characteristics as our JPC-25R but with a heavier 27 lb. weight. Excellent for final presentations. A smooth, rich matte finish.

JPC-24WR

A new water resistant ink jet bond at a highly economical price. Special coating resists dampness and moisture as well as performing well in areas where high levels of humidity are a problem.

JPT-15 Transbond

15 lb. general purpose, low cost translucent ink jet paper with blueprinting capability. Coated for monochrome and spot color plotting.

JPT-18 Transbond

18 lb. general purpose, low cost translucent ink jet paper with blueprinting capability. Coated for monochrome and spot color plotting.

JPV-16 Vellum

16 lb. archival quality ink jet vellum. Excellent erase and re-draw characteristics. Coated for monochrome and spot color plotting.

JPV-20 Vellum

20 lb. archival quality ink jet vellum. The same characteristics as our 16 lb. vellum with the added strength and durability of a heavier weight. Coated for monochrome and spot color plotting. For all ink jet plotters.

JPC-20V

20 lb. archival quality full color ink jet vellum with full color plotting capabilities. Quick drying properties allow for dense area fills and has unique back-lighting capabilities, perfect for poster graphics. Stocked in 36" x 50 yd. roll. Custom sizes available.

Translucent bond is also available in 75 yard rolls.

JPF-3M2

3 mil Double Matte Film. Image erasable 3 mil double matte ink jet film. Coated for monochrome plotting.

JPF-3M2E HT

3 mil Double Matte High Trans Erasable High Quality Film. Erasable with moist eraser. Translucent base provides excellent reproductions. High transmission provides for faster reproduction. Coated for monochrome and spot color plotting.

JPF-3W0

3 mil White Opaque Film. Coated for monochrome plotting.

JPF-4M1

4 mil Single Matte Ink Jet Film, coated for monochrome and spot color plotting.

JPC-4M1

4 mil Single Matte Color Film; dimensionally stable. Provides exceptional full color plots on an archival base. For DesignJet and Calcomp and similar ink jet plotters.

JPF-4M2

4 mil Double Matte Film Image Erasable Film. Coated for monochrome and spot color plotting.

JPC-4M2

4 mil Double Matte Color Film; dimensionally stable. A very dynamic color presentation product. Provides exceptional full color plots on an archival double matte base. Full image erasure capability. For all ink jet plotters.

JPC-35M Premium Presentation Bond

Premium Presentation Bond 35 lb. Premium performance color ink jet paper. Semi-gloss finish provides high resolution and vibrant colors on a 35 lb. bright, white base. An extremely durable presentation bond which accepts black ink coverage exceptionally well. A favourite in the field of geology.

JPF-4M0

4 mil Clear Ink Jet Film with bond interleaf. Coated for monochrome and spot color plotting. Fast drying base allows film to perform exceptionally well in all DesignJets, Calcomp and similar ink jet plotters. Excellent for overlays and presentations.

JPF-4W0

4 mil White Opaque Ink Jet Film. Coated for monochrome and spot color plotting. Smooth matte finish provides subtle, high presentation drawings.

Please note JPF-4M0 clear film in cut sheets is a custom order. Please allow ample time for delivery. Film is available in packs of 25 sheets, 50 sheets and 100 sheets.

JPC-4W0

The Rolls Royce of color ink jet films. This new white opaque, high density gloss film images on a bright white "photo quality" base. Quick drying surface allows full color fills. Priced extremely well; comparable in price to most high gloss bond prices. Performs extremely well on the HP750C, Xerox 2240ij, and NovaJet or other graphics-type plotters.

JPC-6CRH

Color reversal film that is instant drying. 6 mil polyester base produces high gloss prints without laminating. When mirror imaged, the film itself provides protective layer and automatic laminating effect.

32 LB. Matte Resin Coated Bond

Resin coated matte bond performs exceptionally well on the HP650C and the Xerox 2240ij for photographic quality prints. A new product which is getting excellent reviews from the market place.

JPC-26 Fan-Fold Bond

New 26 lb. fan-fold bond is perforated for easy tear. Excellent product for custom size sheets, books, manuals or any requirement which you may have for perforated products. Performs well in all ink jet plotters and printers.

JPC-32P

New 32 lb. high quality, dual purpose printer bond for ink jet and laser desktop printers. Bond is coated for printing on both sides and performs equally well on either an ink jet or a laser printer. Takes full color prints. Economically priced and provides the quality finish required for presentations. Comes packed 400 sheets per pack of 8.5" x 11" sheets.

CADD Supplies

Thermal Media

Media is available in standard cut sheets and rolls. Custom sizes are also available.

TRG-15 Report Grade Paper

15 lb. low cost report grade paper ideal for economical, high volume check plotting.

TRG-18 Report Grade Paper

18 lb. low cost report grade paper ideal for economical, high volume check plotting.

TRG-22 Report Grade Paper

22 lb. low cost report grade paper ideal for economical, high volume check plotting.

TTC-22 Premium Top Coat Paper

A bright 22 lb. top coated paper that is scratch and scuff resistant. Easy handling with presentation quality plots. Our most popular thermal product.

TPO-25 Presentation Opaque Paper

Our highest quality 25 lb. heavy weight paper that is top coated to resist marking. The bright white base offers excellent contrast, premium line density and clarity. This media is the best diazo choice for final and presentation plots.

TSV-15 Synthetic Vellum

This synthetic vellum media provides quality plots on a translucent base. Scratch and mark resistant surface yields superior handling and unique base structure eliminates curl. Ideal for low volume reproduction.

TRV-121 Thermal Vellum

Durable, high quality 20 lb. translucent base offers superior line quality. The scuff and mark resistant surface is archival quality and ideal for high quality diazo and xerographic reproduction.

TMF-30 Matte Film

3 mil dimensionally stable matte film offers high quality archival plots. High translucency for superior diazo reproduction.

TCF-35 Clear Film

This clear polyester base film is dimensionally stable. The high light transmission provides the best quality diazo reproductions possible and perfect for overlays.

CADD Supplies

Laser Media

Media is available in standard cut sheets and rolls. Custom sizes are also available.

20 LB. Bond

A 20 lb. opaque bond is an economical and quality choice for check or final plots.

24 LB. Bond

The heavy weight and bright white base make presentation plots stand out. The smooth finish permits top quality, high contrast plots.

Translucent Bond

An 18 lb. translucent base provides an economical alternative to vellum. Good for short run diazo reproduction.

16 LB. Vellum

16 - 17 lb. vellum provides high quality imaging for final plots and excellent diazo reproductions. For archival storage.

20 LB. Vellum

HXA 20 lb. vellum provides high quality imaging for final plots and excellent diazo reproduction. Excellent product for archival records.

Laser Film 3M2XS

4 mil Double Matte Laser Film. A new heat resistant coating completely eliminates waves and ripple effects while maintaining excellent toner adhesion and dimensional stability.

Vellar

A unique hybrid media combining the easy handling quality of vellum with the dimensional stability and strength of film. The best quality images on an indestructible inner film make this media the top choice for high speed diazo reproduction. Excellent erase and redraw on outer vellum surface.
